ORDINARY MEETING 25 NOVEMBER 2026	5.5

REGISTER OF PREQUALIFIED SUPPLIERS (ROPS) CT005369 – TRADE SERVICES AND SUPPLIES

CIA 63/1/487-01 | #7971384

RECOMMENDATION:

That Council:

1. **Approves the establishment of the Register of Prequalified Suppliers (ROPS) CT005369 – Trade Services and Supplies and appoints the list of Suppliers in Attachment 1, for a term of five years commencing 1 January 2027, with an extension option of up to five years, available at Council's discretion.**

2. **Delegates authority to the Chief Executive Officer in accordance with the *Local Government Act 2009* to enter into a contract, negotiate, finalise and execute any and all matters associated with or in relation to this contract, including conducting panel refresh processes and appointing additional Suppliers to the panel, subject to Council's normal procurement policies and practices.**

INTERESTED PARTIES:

Refer to Attachment 1 – Supplier Recommendation List

Note: The identification of interested parties is provided on a best endeavours basis by Council Officers and may not be exhaustive.

EXECUTIVE SUMMARY:

This report seeks approval to establish a new Register of Prequalified Suppliers (ROPS) CT005369 – Trade Services and Supplies, to achieve efficiencies in administrative processes associated with a high volume of trade works and services and purchasing requirements, enabling Council officers to meet operational, buildings, facilities and infrastructure maintenance needs.

The proposed ROPS will provide a panel of suitably qualified and experienced suppliers and contractors who can be engaged to provide trade services and/or supplies to undertake the modification, repair, refurbishment, renewal, and maintenance of existing assets. The arrangement will be used across multiple areas of Council to facilitate the efficient delivery of both planned and responsive works.

The new ROPS is intended to replace the existing ROPS 2789 – Trade Services and Supplies, which is due to expire on 31 December 2026 and has no remaining extension options available.

The tender and evaluation process resulted in recommendations for the appointment of suitably qualified suppliers across 54 categories, ensuring Council has the capability of meeting its current and future operational needs. It is recommended that 164 suppliers, as detailed in **Attachment 1**, be appointed to the ROPS.

It is proposed that ROPS CT005369 be established for an initial term of five years commencing from 1 January 2027, with one extension option of up to five years available at Council's discretion, providing a flexible and sustainable procurement framework to support its operational and maintenance requirements across the organisation.

BACKGROUND:

Council invited tenders pursuant to section 228 and section 232 of the *Local Government Regulation 2012* (Qld) (Regulation).

The tender was advertised on 5 May 2026 and closed on 17 June 2026. A total of 169 tenders were received from each of the tenderers identified in **Attachment 1**.

The evaluation panel consisted of members who represent the Council branches that primarily utilise and benefit from the establishment of this ROPS. These branches included Asset Services, Works and Project Management Office all within the Cairns Infrastructure and Assets Directorate (CIA).

Tenders were checked for conformance against the requirements outlined in the tender documents. When reviewing the submissions, the evaluation panel had regard to the sound contracting principles in accordance with section 104 of the *Local Government Act 2009* (Qld). Due to the significant volume of submissions received, the diverse range of categories, and the nature of this ROPS, a traditional weighted scoring methodology was not considered appropriate. Instead, a comprehensive assessment process was undertaken to determine each Tenderer's relevant experience, qualifications and suitability for appointment to the ROPS.

Following completion of the post-tender clarification process, five suppliers were not recommended for appointment to the ROPS. This was due to either voluntary withdrawal, insufficient information being provided in their submissions and a lack of response to subsequent clarification requests, or the nature of their businesses being outside the scope of the ROPS and being more appropriately accommodated under alternative arrangements (refer to Attachment 1 for the list of Contractors not recommended).

As an outcome of the evaluation process, it is recommended that 164 suppliers be appointed to the ROPS. This will provide Council with a sufficiently wide pool of suppliers to provide the delivery of our operational needs.

COMMENT:

A review of Council's current and future operational, maintenance and service delivery requirements identified the need to ensure access to a broad range of qualified suppliers capable of providing trades services and related trade supplies across the organisation.

In response, it was identified that this Register of Prequalified Suppliers (ROPS) should not only continue but also be expanded to include additional categories, providing access

to a broader range of suppliers with the capability, capacity and expertise to support Council's ongoing operational and maintenance needs. This will provide Council with greater value-for-money opportunities, improved resource availability during periods of high demand, and increased flexibility when procuring trades services and supplies from a panel of prequalified suppliers.

Furthermore, this arrangement is intended to facilitate efficient engagement of suppliers for both planned and reactive works. Engagements may be undertaken using Council's Standard Terms and Conditions for Goods and Services, or other suitable contract arrangements depending on the nature, value and complexity of the requirement.

The arrangement allows Council to undertake a market refresh at any time during the contract term, including any extension periods, to invite additional suitable suppliers to apply for appointment to the Register of Prequalified Suppliers, subject to the applicable terms and conditions.

OPTIONS:

Option 1: (Recommended)

That Council:

1. Approves the establishment of the Register of Prequalified Suppliers (ROPS) CT005369 – Trade Services and Supplies and appoints the list of Suppliers in Attachment 1, for a term of five years commencing 1 January 2027, with an extension option of up to five years, available at Council's discretion.

2. Delegates authority to the Chief Executive Officer in accordance with the *Local Government Act 2009* to enter into a contract, negotiate, finalise and execute any and all matters associated with or in relation to this contract, including conducting panel refresh processes and appointing additional Suppliers to the panel, subject to Council's normal procurement policies and practices.

Option 2:

That Council does not endorse the award of Register of Prequalified Suppliers (ROPS) CT005369 – Trade Services and Supplies and adopts an alternative course of action.

CONSIDERATIONS:

Risk Management:

The risks associated with the establishment of this ROPS have been considered and are regarded as manageable.

Financial risks will be managed through Council's annual operational and capital budget processes for building, facilities, maintenance and related works. Council Officers are encouraged to seek competitive quotations where appropriate to ensure value for money is achieved and expenditure remains within approved budgets.

Political and market-related risks, including global economic conditions, international events, fuel price fluctuations, supply chain disruptions, labour availability and increasing

material costs, may impact the delivery of trades services and supplies. These risks will be mitigated through ongoing market monitoring, obtaining quotations prior to engagement, and maintaining flexibility in planning and delivery timeframes where required.

Social risks associated with this procurement methodology are considered low. Where appropriate, Council will continue to support opportunities for local suppliers and contractors to participate in quotation processes and service delivery activities.

Operational risks are minimised through the use of an established panel of prequalified suppliers, many of whom are known to Council through existing arrangements or previous engagements and have demonstrated the necessary experience, qualifications and capability. Supplier performance, workmanship and quality will be monitored throughout engagements to ensure Council's standards and expectations are met. Prior to engagement, Council Officers are required to undertake appropriate due diligence, including verifying licences, insurances and relevant safety requirements. Council also recognises that trade contractors can experience capacity constraints during periods of high demand. To mitigate this risk, the contract provisions allow Council to engage suppliers outside the ROPS where necessary or undertake project-specific quotation processes to secure suitable resources.

Environmental risks will be considered on a case-by-case basis. Where works have the potential to impact the environment, Council Officers will assess supplier responses and proposed methodologies to ensure relevant environmental obligations, approvals and controls are identified and addressed.

Other risks include ongoing supply chain constraints and shortages of trade products, equipment and materials, which may impact lead times and project delivery. To mitigate this risk, Council will maintain regular communication with suppliers and contractors and encourage early notification of material shortages, extended lead times and other issues that may affect the supply and delivery of goods and services.

Council Finance and the Local Economy:

The last financial year expenditure (1 July 2025 to 30 June 2026) with the existing suppliers on the ROPS was estimated at approximately $16 million excluding GST. Most Suppliers are Cairns based therefore the majority of expenditure remains within the local economy.

Future expenditure is expected to remain at a similar level; however, this will depend on the extent to which suppliers are engaged under this arrangement compared with other procurement pathways and open tender processes.

The budget for works associated with engagements under ROPS CT005369 sits across both operational and capital budgets of many business areas, with the majority in the Cairns Infrastructure and Assets Directorate. It is the responsibility of Council officers to ensure that there is sufficient budget allocated for the works before confirming any engagements under ROPS CT005369.

Of the 164 recommended suppliers, 143 are local (87% local) with businesses established within the rate-paying region of Cairns, and 8 of these suppliers have identified as indigenous businesses.

Corporate and Operational Plans:

The services forming the basis of this report relate to the following goals in Council's Corporate Plan 2025 to 2030:

- Promote and protect the growth of diverse industries and small business;
- Invest in community infrastructure and services;
- Fostering a vibrant and healthy community where everyone feels they belong;
- Provide spaces for the benefit of the community; and
- Delivery of quality services to the community.

Statutory:

The tender process has been conducted in accordance with legislative requirements under the *Local Government Act 2009* and the *Local Government Regulation 2012*.

Policy:

The tender process was undertaken in accordance with Council's adopted Procurement Policy.

CONSULTATION:

Executive Managers representing the Council branches that are expected to utilise and benefit most from this ROPS were consulted through a series of meetings to review the current arrangement and identify the need for the expansion of the new arrangement.

Broader consultation was also undertaken across Council via email to identify additional categories or service areas that may benefit from inclusion in the ROPS. This process received positive engagement and valuable feedback from stakeholders.

The consultation, review, tender, probity, and evaluation processes were facilitated by the Procurement and Payables Branch.
