

Manager Information Services

Using a sophisticated suite of technologies, the Information Services branch supports an organisation of over 1,400 staff in delivering services to the community of Cairns. This key leadership position manages a large team of professionals whose role is to develop and deliver cost effective ICT solutions and services in support of Council operations. The role offers candidates a great opportunity to further develop their career within a diverse and challenging work environment. To be successful applicants must demonstrate;

- Bachelor Degree in Business or Information Technology
- Experience leading a large team in a geographically dispersed, multi-faceted organisation
- A thorough knowledge of software development; database technologies; networking; communications and systems development
- Excellent skills in budgeting; project and change management; system integration; customer engagement; and resourcing.

Applications Close Wednesday 25 November 2009
