

PART 1 PRELIMINARY

1.1 Title

This resolution may be cited as the Cairns Regional Council Infrastructure Charges Resolution (No.1) 2017.

1.2 Sustainable Planning Act

This resolution is made under Section 630 of the Sustainable Planning Act 2009.

1.3 Effect

This resolution and an adopted charge under this resolution takes effect on and from 1 July 2017.

1.4 Purpose of the resolution

The purpose of the resolution is to:

- a) Adopt charges (each **an adopted charge)** for the purpose of determining a levied charge for development for funding the cost of the trunk infrastructure networks identified in the LGIP, namely:
 - i. water supply;
 - ii. wastewater;
 - iii. stormwater;
 - iv. transport:
 - v. public parks and land for community facilities.
- b) State other matters relevant to the adopted infrastructure charge;
- c) Include a method for working out the cost of infrastructure the subject of an offset or refund; and
- d) Include criteria for deciding a conversion application.

1.5 Application to the local government area

This resolution applies to the entire Cairns Regional Council Local Government Area.

PART 2 RELATIONSHIP WITH SPRP (ADOPTED CHARGES)

2.1 Relationship to the maximum adopted charge

a) This resolution adopts a charge rate for particular development that is equal to or less than the maximum adopted charge rates contained in the SPRP (Adopted Charges) and adopts different charges for particular development in different parts of the local government area (as detailed in Section 3.2).

PART 3 ADOPTED INFRASTRUCTURE CHARGE

3.1 Development subject to infrastructure charges

Subject to clause 3.2 and the provisions of the *Sustainable Planning Act* 2009, this resolution applies to assessable development for the following development, as determined under Part 5 tables of assessment of the planning scheme:

- a) Reconfiguring a lot;
- b) Making a material change of use of premises;
- c) The carrying out of building work.

3.2 Applicable infrastructure charges

- a) It is resolved to adopt the infrastructure charges rates (the Charge Area and Capped Charge rates contained in Table 1, each an **adopted charge**) for particular development located within and outside of the Charge Area identified in Map 1.
- b) Where development is located outside of the Charge Area identified in Map 1, and is contiguous to the Charge Area boundary, the adopted charge for development is the Charge Area rate contained in Table 1.
- c) For all other development located outside of the Charge Area identified in Map 1, the adopted charge for development is the Capped Charge rate contained in Table 1.
- c) The adopted charge rates for development contained in Table 1 comprises a stormwater network charge and a charge rate for other networks.

PART 4 LEVIED CHARGE

4.1 Calculation of the levied charge

a) Subject to section 4.1.d, a levied charge for development is calculated as follows:

LC = AC - C

Where:

LC is the total infrastructure charge that may be levied by Council (the **Levied Charge**).

AC is the charge for the proposed development calculated as follows:

- unit of measure x the adopted charge rate (stormwater and other networks) for the respective development identified in Table 1.

C is the credit calculated in accordance with Section 4.2.

- b) Where the adopted charges associated with the credit (C) exceed the adopted charge for the proposed development (AC), then:
 - i. no infrastructure charges will be required; and
 - ii. no refund will be given.
- c) For the purposes of calculating AC or C in accordance with Section 4.1, where development involves:
 - the reconfiguration a lot that will create additional vacant allotments, or where vacant allotments exist, the '3 or more bedroom dwelling house' adopted charge rate contained in Table 1 is the rate to be used for the development in the calculation;
 - ii. dual land uses, the highest adopted charge rate associated with the land uses involved in the development contained in Table 1 is the adopted charge rate to be used in the calculation.
- d) The following proportional deductions to the levied charge for development that is located outside of the Charge Area identified in Map 1 apply:
 - i. 35% for all development where there is no waste water connection to the subject premises;
 - ii. 30% for residential development where there is no water supply to the subject premises;
 - iii. 25% for non-residential development where there is no water supply connection to the subject premises.

4.2 Additional demand

- a) Section 636 of the *Sustainable Planning Act 2009* provides that a levied charge may be only for additional demand placed upon trunk infrastructure.
- b) In accordance with section 636, a credit will be applied for the following:

- i. an existing use on the premises if the use is lawful and already taking place on the premises, unless an infrastructure requirement that applies or applied to the use or development has not been complied with;
- ii. a previous use that is no longer taking place on the premises if the use was lawful at the time it was carried out, unless an infrastructure requirement that applies or applied to the use or development has not been complied with;
- iii. other development on the premises if the development may be lawfully carried out without the need for a further development permit unless:
 - an infrastructure requirement that applies or applied to the development has not been complied with; or
 - an infrastructure requirement applies to the land on which the development will be carried out and that requirement was imposed on the basis of development of a lower scale or intensity being carried out on the land.
- c) In accordance with Section 4.1.b., and for the purpose of Section 4.1, C is calculated as follows:
 - unit of measure x the adopted charge rate (stormwater and other networks) for the respective existing development identified in Table 1.

4.3 Indexing of infrastructure charges

- a) It is resolved to provide for automatic increases in:
 - i. the levied charges from when they are levied to when they are paid (an **automatic increase provision**); and
 - ii. the adopted charge rates for development located in the Charge Area, up to the value of the Capped Charge rate contained in Table 1, on a quarterly basis.

The increases will be calculated in accordance with the Consumer Price Index: All Groups, Brisbane.

- b) The increases calculated in accordance with 5.3.a uses the applicable quarterly index value at the date the charge was levied to the applicable quarterly index value at the date the charge is to be paid.
- c) Under section 631(5) of the *Sustainable Planning Act 2009*, an automatic increase in levied charges from when they are levied to when they are paid must not be more than the lesser of the following:

- the difference between the levied charge and the maximum adopted charge the local government could have levied for the development when the charge is paid;
- ii. the increase for the PPI index for the period starting on the day the levied charge was levied and ending on the day it is paid, adjusted by reference to the 3-yearly PPI index average.

PART 5 LGIP

5.1 Planning assumptions

The planning assumptions about future growth and urban development are identified in the LGIP.

5.2 Priority infrastructure area

The priority infrastructure area is identified in the LGIP.

5.3 Trunk infrastructure networks

The trunk infrastructure networks to which an adopted charge applies are identified in the LGIP.

5.4 Desired standard of service

The desired standards of service for each network are detailed in the LGIP.

5.5 Plans for trunk infrastructure

The existing and future plans for trunk infrastructure for the local government area are contained in the LGIP.

5.6 Infrastructure Work Schedule

The infrastructure works schedules, including the establishment cost of trunk infrastructure items, are contained in the LGIP.

PART 6 COST OF INFRASTRUCTURE OFFSETS OR REFUNDS

6.1 Establishment cost for works

The cost of the infrastructure for determining offsets and refunds for trunk infrastructure identified in a necessary infrastructure condition is the establishment cost identified in the LGIP.

6.2 Method for calculating infrastructure costs subject of the offset or refund

The process used to recalculate establishment costs when an application is made under section 657 of the SPA is:

a) Where a notice is given by an applicant under section 657 of the Sustainable Planning Act 2009 for the recalculation of the establishment cost for trunk infrastructure, the applicant must, at their own cost, provide Council with the following:

for trunk infrastructure that is works:

- a bill of quantities for the design, construction and commissioning of the trunk infrastructure in accordance with a scope of works that is provided by Council; and
- ii. a first principles estimate for the cost of designing, constructing and commissioning the trunk infrastructure specified in the bill of quantities.

for trunk infrastructure that is land,

- i. a valuation of the specified land undertaken by a certified practicing valuer.
- b) Council must give a notice to the applicant which states whether the bill of quantities and the cost estimate or the valuation are accepted.
- c) If Council accepts the bill of quantities and the cost estimate or the valuation, the cost estimate or valuation is the establishment cost of the infrastructure.
- d) If Council does not accept the bill of quantities and the cost estimate or the valuation, Council must, at its own cost:
 - for the bill of quantities and the cost estimate, have an assessment undertaken by an appropriately qualified person to:
 - determine whether the bill of quantities is in accordance with the scope of works provided by Council;
 - determine whether the cost estimate is consistent with current market costs calculated by applying a first principles estimating approach to the bill of quantities; and
 - provide a new cost estimate using a first principles approach.
 - ii. for the valuation, have a valuation undertaken by a certified practicing valuer.
- e) If Council rejected the bill of quantities and the cost estimate or the valuation in accordance with section 6.2.d, it must provide the

applicant with the following in writing:

- i. reasons why it rejected the bill of quantities and cost estimate or the valuation; and
- ii. the proposed new bill of quantities and cost estimate or the valuation as determined in accordance with section 6.2.d.
- f) Where written notice has been given by Council in accordance with section 6.2.e:
 - i. the applicant may negotiate and agree with Council regarding the cost estimate or valuation; and
 - ii. the cost estimate or valuation agreed in accordance with section 6.2.f.i. is the establishment cost of the infrastructure.
- g) If agreement in accordance with section 6.2.f.i. cannot be reached, Council must:
 - i. for the bill of quantities and the cost estimate, refer the bill of quantities and the cost estimate to a suitably qualified expert agreed to by both the applicant and Council to:
 - assess whether the bill of quantities is in accordance with the scope of works:
 - assess whether the cost estimate is consistent with current market costs calculated by applying a first principles estimating approach to the bill of quantities; and
 - provide an amended cost estimate using a first principles estimating approach.
 - ii. for the valuation, have a valuation undertaken by a certified practicing valuer agreed to by both the applicant and Council to assess the market value.
- h) The cost of the independent assessment carried out in accordance with section 6.2.g must be shared equally between the applicant and Council.
- i) The amended cost estimate or valuation determined in accordance with section 6.2.g is the establishment cost of the infrastructure.
- j) If the applicant and Council cannot agree on the appointment of a suitably qualified expert or certified practicing valuer for the purposes of section 6.2.g, the establishment cost of the infrastructure is determined by calculating the average of the cost estimates or valuations prepared in accordance with sections 6.2.a and 6.2.d.

- k) Where Council accepts the amended cost in accordance with 6.2.c. or 6.2.j, Council will update the following to include the infrastructure item:
 - i. The infrastructure charges notice associated with the applicant's Development Approval; and
 - ii. Council's Local Government Infrastructure Plan.

PART 7 CONVERSION APPLICATIONS

- a) Where an applicant makes application under section 659 of the *Sustainable Planning Act 2009* for conversion of infrastructure required by a non-trunk infrastructure condition to be considered trunk infrastructure, all of the following criteria must be met:
 - The infrastructure required to service the development is consistent with the assumptions about growth, type, scale, location and timing of development and infrastructure network planning methodologies contained in Council's Local Government Infrastructure Plan, including extrinsic material;
 - The infrastructure required to service the development is consistent with the desired standards of service detailed in Council's Local Government Infrastructure Plan;
 - iii. The infrastructure required to service the development is consistent other trunk infrastructure identified in Council's Local Government Infrastructure Plan;
 - iv. The infrastructure is not consistent with non-trunk infrastructure for which conditions may be imposed in accordance with section 665 of the *Sustainable Planning Act 2009* or section 99BRDJ of the SEQ Water Act; and
 - v. The type, size and location of the infrastructure is the most cost effective option for servicing multiple users in the area.

PART 8 DICTIONARY

1. Dictionary

Words and terms used in this resolution have the meaning given in the *Sustainable Planning Act 2009*, the planning scheme2016 or the Queensland Planning Provision version 4.0.

If a word or term used in this resolution is not defined in the *Sustainable Planning Act 20*09, CairnsPlan 2016 or the Queensland Planning Provision version 4.0, has the meaning given in this section.

Other terms used within this resolution:

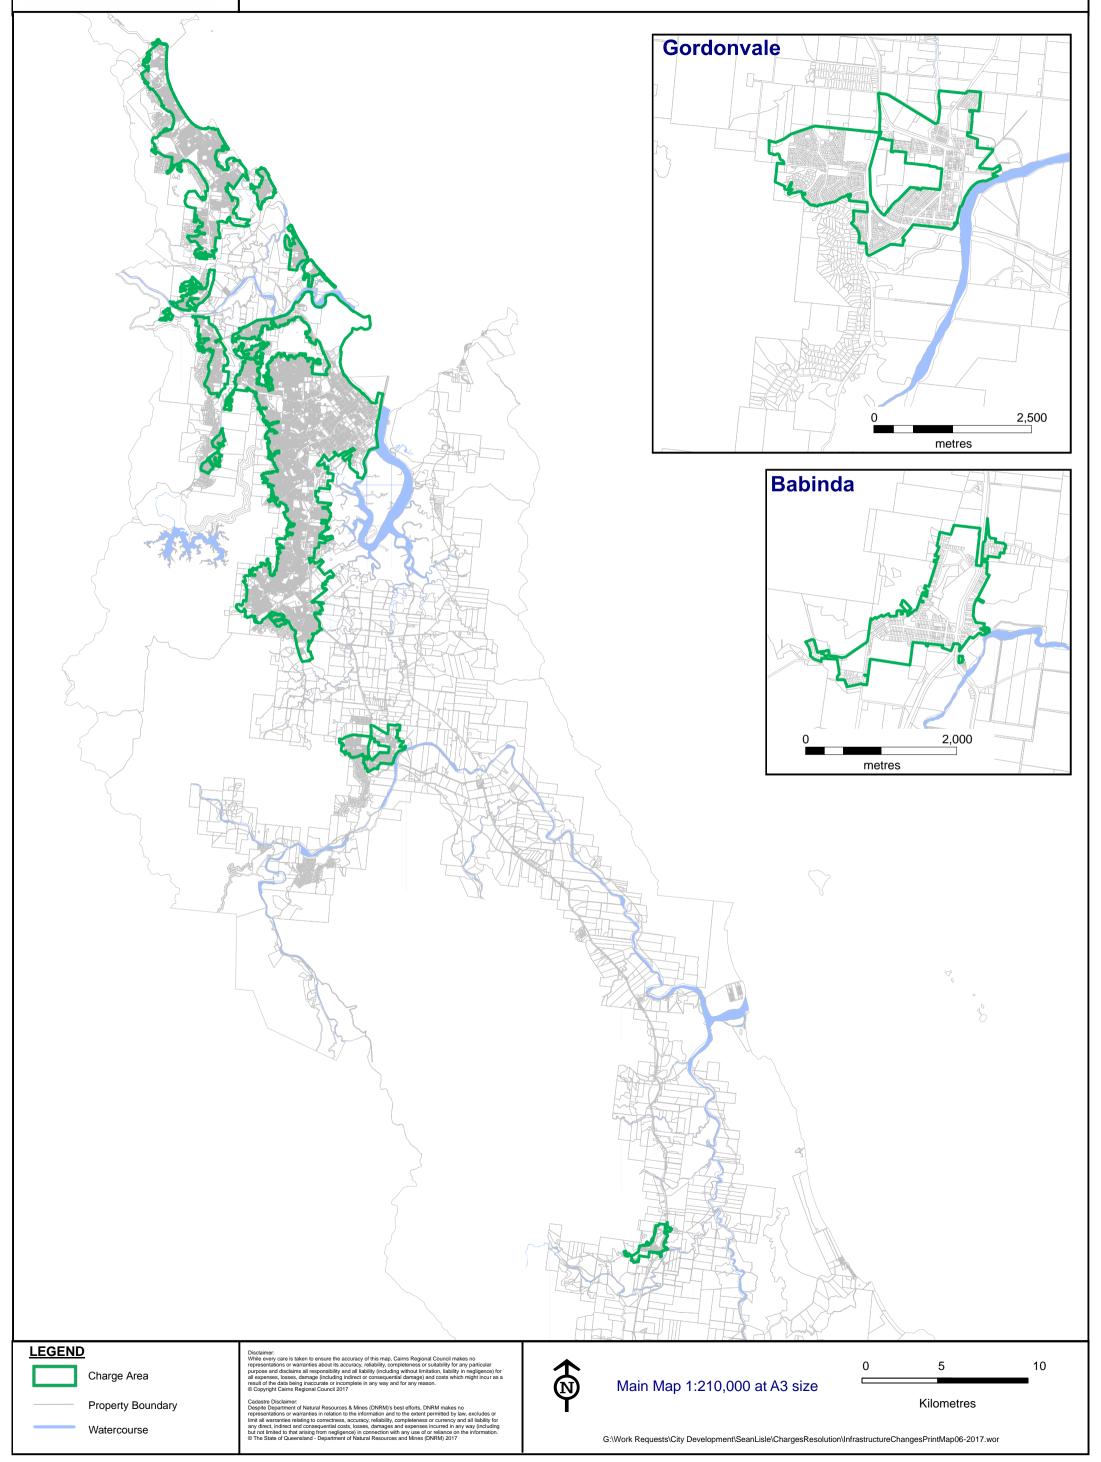

Most cost effective option – means the least cost option based upon the life cycle cost of the infrastructure required to service future urban development in the area at the desired standard of service.

Planning scheme means the Cairns Regional Council Planning Scheme 2016 - CairnsPlan 2016 Version 1.1, adopted by Cairns Regional Council on 28 June 2017 and commenced on 1 July 2017.

SPRP (Adopted Charges) means the State Planning Regulatory Provision (Adopted Charges) July 2012 and associated Adopted Infrastructure Charges Schedule 2016 released by the Queensland Government in June 2016.
