LOCAL GOVERNMENT NOTICES

ATHERTON SHIRE COUNCIL

TOWN PLANNING SCHEME

LOCAL GOVERNMENT ACT 1936-1983
APPLICATION FOR REZONING

NOTICE is hereby given that an application has been made for an amendment of the Town Planning Scheme for the Shire of Atherton by excluding land hereinafter mentioned from a zone and including the said land in another zone.

1. Location of land: Cnr Mountain View Drive and Gillies Highway, Atherton.
2. Zone from which the land is proposed to be excluded: Rural Residential B.
3. Zone in which the land is proposed to be included: Rural Residential C.

Particulars of the application and accompanying documents or a copy thereof are open to inspection by any person at the Council's Office situated at 45 Mabel Street, Atherton on or before 25/1/1990.

Objections to the granting of the application shall be lodged with the Shire Clerk on or before the abovementioned date. Every objection shall be in writing; be signed by each person who makes the objection; be addressed to the Shire Clerk and shall state the name and address of each person who makes the objection and the grounds of objection and the facts and circumstances relied on by the objector in support of those grounds.

CITY OF CAIRNS

During 1990 a comprehensive review of the exisiting Town Planning Scheme for the city will be undertaken. It will involve reviewing all town planning and subdivision of land requirements.
For the first time a forward looking strategic plan will be drafted to guide the overall development of the city beyond the year 2000 and address the major issues of commerce, housing, employment, accommodation and tourism.
To ensure the new town planning scheme reflects the wishes of the people of Cairns you are invited to express your views in writing on any matter that is important to you relating the ongoing development of the city.
A comment sheet is availalbe at the public counter of the planning and building department and submissions will be accepted up until the end of February 1990.

SHIRE OF MULGRAVE TOWN PLANNING SCHEME

PROPOSED USE OF LAND

Application has been lodged with the Mulgrave Shire Council for consent to use land. Details are described below:
Location of Land: Redlynch Intake Road, via Redlynch.
Existing Zoning: Rural C.
Nature of Proposed Use: Extractive Industry (Hard Rock Quarry).
Particulars of the application and accompanying documents or a copy thereof are open to inspection by any person at the Council's office situated at 51 The Esplanade, Cairns, on or before 8th January, 1990.
Objections to the granting of the application shall be lodged with the Shire Clerk on or before the abovementioned date. Every objection shall be in writing; be signed by each person who makes the objection; be addressed to the Shire Clerk and shall state the name and address of each person who makes the objection and the grounds of objection and the facts and circumstances relied on by the objector (s) in support of those grounds.
If the objection is made by more than one person, it may state the name and address of the objector nominated as the person to whom a notice under Section 33 (18) (j) of the Local Government Act is to be given in respect of the application the subject of the objection.

TOWN PLANNING

15th May, 1990

Dear Sir/Madam,

RE: CONSENT APPLICATION BY KIAP PTY. LTD. FOR LAND DESCRIBED AS LOTS 8 & 9 ON R.P. 749301, PORTION 147, PARISH OF CAIRNS, SITUATED AT REDLYNCH INTAKE ROAD FOR THE PURPOSE OF AN EXTRACTIVE INDUSTRY.

I write to advise that Council decided to grant consent to use land described as Lots 8 and 9 on R.P. 749301, Portion 147, Parish of Cairns, situated at Redlynch Intake Road for the purpose of an extractive industry subject to compliance with the following conditions:

1. Compliance at all times with the requirements of Council's By-laws and any conditions or provisions of a permit issued under the provisions of Chapter 18 of Council's By-laws.

2. The hours of operation for the extraction, blasting and hauling of materials shall be limited to 7.00 a.m. to 6.00 p.m. E.S.T., Monday to Friday and 7.00 a.m. to 12 noon Saturday. No operations shall be undertaken on Sunday or Public Holidays except with the permission of Council. The hours of operation may be varied by Council from time to time.

3. The applicant is to limit the number of trucks using Redlynch Intake Road in accordance with the following provisions

   (a) while a valid extractive industry permit exists for the C.Q.C. quarry, Moore Road, Kewarra Beach - 15 loaded trips per hour;

   (b) subsequent to the cancellation of the permit for the C.Q.C. quarry, Kewarra Beach, and prior to the construction of an alternative haul route which bypasses Redlynch - 18 loaded trips per hour;

KIAP PTY LTD
C/- Chapman and Balderson,
P.O. Box 1949,
CAIRNS QLD 4870

44

Released under RTI

(c) subsequent to the cancellation of the permit for the C.Q.C. quarry, Kewarra, Beach, and construction of an alternative haul route which bypasses Redlynch - 26 loaded trips per hour.

The above trip rates are to be based on daily averages and the Council may from time to time approve other trip rates upon specific applicaton being made for particular contracts.

4. The applicant shall comply with the findings and recommendations of the supporting information accompanying the application and in particular the following:

'i)existing background noise levels in the residential subdivision be obtained to confirm our estimate of background noise levels of 35-40 dB(A), ii) bulldozers and rockdrills be used which are effectively muffled and iii) the quarry plan allow for an initial working direction of west to east, so that the rockdrill would be operating behind a barrier, eliminating line of sight to the residential area.'

In any case the operator is to comply with the requirements of the Noise Abatement Authority and Council's Chief Health Surveyor with regard to the mitigation of any noise problems.

5. The applicant is to carry out one or more test blasts to determine the overblast pressure and vibration levels resulting from the given blast. From this a maximum charge per delay will be set to the satisfaction of the Department of Mines and the Shire Engineer.

6. The applicant is responsible for the fixing of or obtaining of quarrying equipment with appropriate devices for noise and dust suppression to the satisfaction of the Shire Engineer and the Department of Mines and to ensure that noise and dust emissions do not constitute a public or private nuisance.

7. The applicant is responsible for the provision of a 40m treed buffer along the ridge to be worked by the operation of the quarry. Such buffer shall be planted and maintained as outlined in the report accompanying the application, with the exception of the following:

(a) No cut or other earthwork shall take place from the top of the buffer area as proposed. The method of retaining rolling rocks shall be to both Council's and Department of Mines' satisfaction.

(b) Watering of the plants in the buffer strip shall be by way of a reticulation system supplying to each individual plant.

Released Under RTI

8. The site shall be progressively rehabilitated as each new stage begins. The maximum number of operational benches at any one time shall be three. Such rehabilitation shall be generally in accordance with the recommendations of the report supplied to Council, subject to more detailed analysis and carried out in accordance with plans and procedures approved by and to the requirements and satisfaction of the Parks Superintendent with approval to be obtained before the Chapter 18 permit is issued.

Further, clearing of the site down hill from the benches being operated shall be sufficient only for the next succeeding bench.

Unless Council otherwise decides the maximum face height of the top three benches shall be 7.5 metres and all lower benches 15 metres, provided that the bench width of any bench in excess of 7.5 metres height shall be at least 10 metres.

9. Before Council will issue the Chapter 18 permit the applicant shall supply details of how run-off from the site shall be treated to ensure the water quality of the run-off entering Curranda Creek. Such details shall include the following:

(a) A plan showing the system of catch drains and how they will entrap all parts of the quarry, including haul routes, stockpiles and benches and the method of scour prevention and dimensions of these drains.

(b) The size of settlement ponds including dimensions of depth, method of maintenance and the basis of their design.

(c) Method of minimising exposure of highly erodable parts of the site or different stages of operation, for instance the initial clearing of trees.

(d) The method of retention on the site and its appropriate disposal of petroleum by-products from machinery and vehicles so that fuels, oils etc. do not enter watercourses with stormwater.

The design of the above shall be for a Q2 storm event and relevant calculations of run-off etc. shall be supplied.

All stormwater discharges from the operations area of the quarry shall be via a system of settlement ponds and a filter designed to the requirements and satisfaction of the Shire Engineer.

The applicant shall ensure that the quality of water entering Curranda Creek from the operations area is not worse than the quality of water in the creek at the time of discharge.

Released under RTI

10. The applicant shall be responsible for the rehabilitation of the existing (alluvial) quarry to the requirements and satisfaction of the Council. The applicant shall supply to Council plans and a timetable of works to be carried out within thirty (30) days of the issue of the Chapter 18 permit for this site. The rehabilitation works shall be commenced within thirty (30) days of the approval of such plans and be completed within a time period agreed between the Council and the landowner but not later than nine (9) months from the date of the approval of the rehabilitation plans.

The applicant shall supply the Council an additional bond of $20,000, making a total of $40,000, securing the rehabilitation works prior to the transfer of the Chapter 18 permit for this site from Kiap Pty. Ltd.

11. The worked area is to be fenced in accordance with Chapter 18 - Extractive Industries - of Council's By-laws to Council's satisfaction such that the public are reasonably excluded from the site.

12. The applicant shall not breach the ridge outlined in Condition 7 until the 40m buffer has been established with trees displaying continuous screen with an average minimum height of not less than 2 metres.

13. The Consent shall be valid for a period of twenty-five (25) years or until the Chapter 18 permit issued in conjunction with it, expires or is cancelled, whichever is sooner, provided that the conditions of the permit may be reviewed by Council two (2) years after the permit commences and every five (5) years thereafter to ensure that they remain relevant to the nature of the operation.

14. The applicant shall contribute towards the upgrading, realignment and increased maintenance of road made necessary by the traffic generated by the quarry. The contribution shall be determined at the time of the issue of the Chapter 18 permit when better details of the scope of the operation are revealed.

Further, Council adopted a policy in relation to Chapter 18 Permits where the Council or its delegate determines that a permit should be suspended because of a breach of the conditions of the permit, Chapter 18 of the by-laws or the conditions of the Town Planning Consent, the suspension shall be for a minimum of seven (7) days plus seven (7) days for each time the permit has been previously suspended in the preceding five (5) years.

In accordance with the provisions of the Local Government Act, I enclose extracts of Section 33 of the said Act for your information. Schedule 4 Part 4 (6)(1)
