

Disclaimer:
 The Flood and Inundation hazards overlay identifies designated flood hazard areas and trigger areas (flood and storm tide inundation areas) where modelling has been undertaken by council or where identified by the State Government. The overlay does not represent mapping of a defined flood event and is provided to ensure that the risk of inundation is assessed and mitigated when development is proposed. The Flood and inundation hazards overlay is not prepared for insurance eligibility determination purposes and is not suitable to determine whether an existing building is subject to flooding, nor does the overlay account for pre-existing localised drainage matters.
