**Denotes contestable grant stream*

COMMENT:

Grants inwards from State and Federal Government agencies make a significant contribution to Council's capital and operating revenue streams. Many State and Federal Government grant programs are contestable meaning that applications for funding made by Council are assessed against competing applications from other applicants. Council maintains a grants inwards database ('the grants database') to track the progress and status of grant applications. An update report is provided to Council every three months.

Attachment one sets out a summary of the current status of grant applications extracted from the grant's database and split into the following categories:

- **Applications pending decision:** Grant applications that have been submitted but for which a decision (successful or unsuccessful) has not yet been made or advised to Council.
- **Successful / active grants:** Grant applications where Council has been awarded funding (successful) and the project has commenced (active).
- **Unsuccessful / withdrawn: (in last three months):** Includes (for the last three months) grant applications that were either unsuccessful or withdrawn / cancelled.
- **Closed / acquitted grants (in last three months):** Includes (for the last three months) successful grant applications where the project has been completed and the grant funding acquitted.

As part of the Infrastructure Activation Fund, the Australian and Queensland governments have announced $220 Million in grants ($110 Million each) along with an $80 million Federal interest free loan for housing-enabling infrastructure including water, sewerage and road infrastructure. This fund will be administered by Economic Development Queensland. Details of this funding are being finalised and as such Council is not yet clear on its allocation from the fund, therefore the final outcome is not currently shown in the main body of this report.

OPTIONS:

Option 1 (recommended):

That Council note the Grants Inwards Status Update Report.

Option 2:

That Council requests further information from Council Officers.

CONSIDERATIONS:

Council Finance and the Local Economy:

Grants and subsidies form a significant revenue stream for Council. Performance against budget is included in Council's monthly financial statements. The following table summarises performance in this regard for the 2026/27 financial year.

Table 3: Grants and subsidies financial performance to 25 September 2026

	YTD Actual $'000	YTD Budget $'000	YTD Variance $'000
Operating revenue			
Grants, subsidies, contributions and donations	1,861	1,486	375
Capital revenue			
Subsidies and grants	31,837	30,870	967

Operating grants, subsidies, contributions and donations are favourable largely due to timing of grant receipts.

Capital subsidies and grants are favourable to budget mainly due to the timing of delivery of the relevant capital works projects, as revenue is recognised in line with expenditure.
